

Darla's Hula Hoops

Darla's Hoops have been reconstructed, larger and with better and more robust quality materials, the new hoops have added weight (anywhere from 1.5 to 5 pounds.)

Modern hoops serve multiple purposes besides the recreational use, professional hoops serve as a fitness tool as well.

Most fine gyms nationwide offered Hula classes inviting participants to sweat into shape swiveling their hips.

Hula classes are a better option for another type of exercises that can have an impact on knees and joints.

Darla has been a hoop artist for more than 20 years, finally approaching us to help her develop a multimedia package that includes, responsive web design for her store.

A public and membership base business with special sales promotions for members.

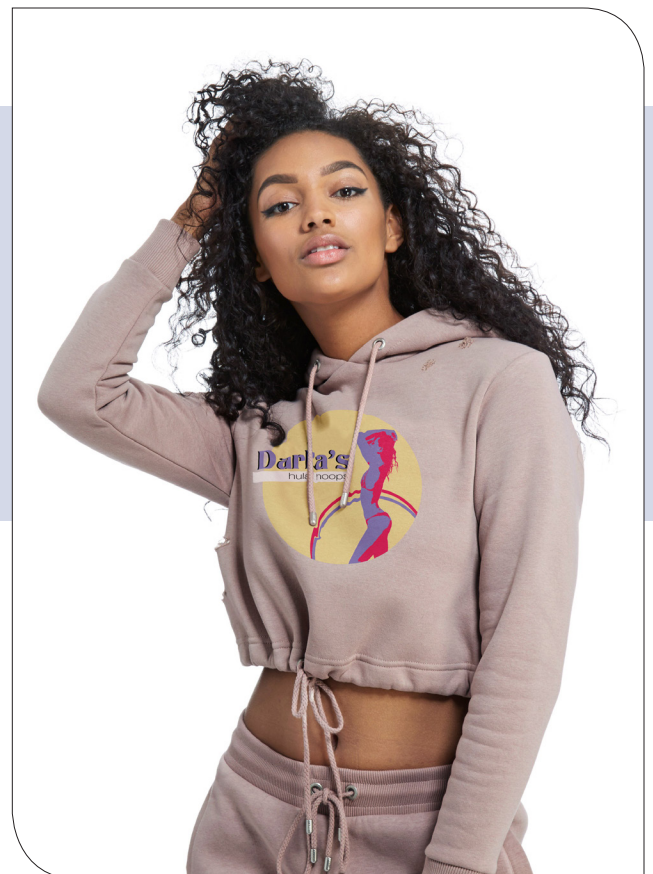

Including in the marketing package in the future is a complete line of products, that will include training videos for members.
